**A TRIBUTE TO WHAT ONCE WAS.
ADOBE STOCK APPAREL SS16.**

Let's celebrate efficiency, firm handshakes and flawless cosmetic dentistry. Let's honor hilarious vegetables and seniors smiling at their laptop. Let's all hail the stock images from an era when stock images were looking very much like... stock images. Finding these images used to require hours on stock photo agency websites. It's time to leave both images and the obsolete workflow behind.

Now, find every image you will ever need without ever leaving your Creative Cloud app. There are actually 50 million hidden under that little magnifying glass. Including a few salads, should you ever feel the need to garnish your work with them.
